Norway Competition.

Commenting on Norway competition, the St. John's Trade Review says:

The contrary being done will, for certain, give the opportunity to the Norwegian exporters of codfish to lay hold of it for their own staple, which, as a rule, being well-cured and cheap, will easily drive out of the market the Newfoundland exporters. Again the abandonment of old markets has always been considered a bad policy. Our bar is good and deep at present, and so it is expected to continue, and preparations are being made to commence the works that will give it and the harbor a permanent and deep condition, ship owners and ship masters should not continue to refrain from sending and bringing their vessels here, as of late years, and most unjustifiably they have been doing. No doubt, vessels cannot enter at ebb tide when the sea is very rough, but this happens also at Oporto, off whose vessels are now frequently kept several days waiting for an opportunity to enter."

Augustus Rogers of the Manomet lifesaving station was notified, but as it is the vacation season, the crew there were away.
